

QUALITY
OF LIFE+

Wanted:

Service Members, Veterans & First Responders with Disabilities

Become a QL+ Challenger.

If you have an injury or disability and you are a member of the military, a veteran or a first responder, QL+ has a program that is designed to improve your quality of life at no charge to you.

As a Challenger, members of the QL+ team will learn about your physical and other limitations so that we can provide you with a solution that increases your independence, mobility and participation in your favorite sports and other activities.

Apply for the program by completing the online application at www.qlplus.org/challengers or email info@qlplus.org.

What to Expect as a Challenger.

Once you become a QL+ Challenger, we will work with you to develop a description of what you would like to improve in your life. We assign this description, or Challenge, to one of the universities where we sponsor our program. You then become a member of a team of engineering students, faculty and a QL+ Project Manager. The team will work on your project and come up with a prototype that is specifically designed for you, at no cost to you.

Your project will normally be designed and built over a 9 month period. The Students and Program Manager will interact with you virtually and when feasible in person – either at your home or at the university. You will have input into the solution so that it meets your expectations as much as feasible. The goal is to provide you with a workable solution to a problem that will improve your quality of life.

Apply now and become a QL+ Challenger. It will change your life.
